Professional Summary

Cloud Developer and DevOps Engineer with 3+ years of experience in building, deploying, and managing scalable cloud infrastructure and automation workflows. Proficient in AWS services, CI/CD implementation, containerization, Infrastructure as Code (IaC), and cloud security best practices.

Core Competencies

- Cloud Platforms: AWS (EC2, S3, Lambda, IAM, VPC, Step Functions), Azure
- DevOps & CI/CD: Jenkins, GitHub Actions, GitLab CI, Terraform, Ansible
- Containerization: Docker, Docker Swarm, Kubernetes (basic)
- Monitoring & Logging: Prometheus, Grafana, ElasticSearch
- Programming & Scripting: Python (Pandas, NumPy), Bash, REST APIs
- Database Management: MySQL, PostgreSQL
- Security Practices: IAM roles & policies, S3 encryption, resource tagging
- Collaboration Tools: Git, GitHub, Agile/Scrum workflows

Professional Experience

DevOps Engineer – Mazenet Solution, Chennai

Oct 2025 – Present

Roles & Responsibilities

- Designed and deployed scalable AWS infrastructure using Terraform.
- Implemented CI/CD pipelines using Jenkins and GitHub Actions.
- Containerized applications using Docker and managed deployments in Kubernetes.
- Configured AWS services including EC2, S3, IAM, RDS, and VPC.
- Automated server provisioning using Ansible.
- Integrated monitoring tools such as Prometheus and Grafana.
- Implemented logging using ELK Stack (ElasticSearch, Logstash, Kibana).

- Applied IAM best practices and security controls.
- Collaborated with cross-functional Agile teams.
- Performed cloud cost optimization and production support.

Tools & Technologies Used

- Cloud: AWS (EC2, S3, IAM, RDS, VPC, Lambda, CloudWatch)
- CI/CD: Jenkins, GitHub Actions, GitLab CI
- IaC: Terraform, Ansible
- Containerization: Docker, Kubernetes
- Monitoring & Logging: Prometheus, Grafana, ELK Stack
- Scripting: Python, Bash
- Version Control: Git, GitHub

DevOps & Cloud Engineer

RND Softek, Coimbatore — Nov 2024 – Oct 2025

- Built and managed secure, auto-scaling infrastructure using Terraform and Ansible on AWS.
- Developed CI/CD pipelines with Jenkins and GitHub Actions for Docker-based microservices.
- Deployed AWS Lambda functions triggered by S3 uploads to automate backend processing.
- Integrated Step Functions to coordinate complex workflows across AWS services.
- Applied IAM best practices for access control and policy enforcement.
- Implemented Prometheus and Grafana for system monitoring and alerting.
- Wrote Python scripts for automation, data cleanup, and monitoring logs.

DevOps Engineer

Altius Technology, Coimbatore — Apr 2023 – Nov 2024

- Deployed and managed containerized applications with Docker Swarm in production.
- Automated infrastructure tasks using Bash and Ansible scripts.
- Supported legacy-to-cloud transitions and ensured uptime during migrations.
- Collaborated with development and QA teams to ensure DevOps pipeline stability.

Software Engineer (DevOps Support)

Cygnus Softek, Coimbatore — Apr 2022 – Apr 2023

- Supported CI pipeline execution and tested deployments.
- Performed API testing and assisted with automated test integration.
- Worked closely with DevOps engineers to ensure smooth production releases.

Education

M.Sc. Computer Science

Sri Krishna College of Arts and Science, Coimbatore — 2021–2023
CGPA: 8.5

B.Sc. Computer Science

Sri Krishna Aditya College of Arts and Science, Coimbatore — 2018–2021
CGPA: 8.2

Certifications

- AWS Certified Badges
- Kubernetes for Beginners – KubeAcademy

Key Projects & Achievements

- Infrastructure as Code – Deployed multi-tier web app using EC2, RDS, and ALB via Terraform. Reduced setup time by 60%.
- Serverless Log Processing Pipeline – Used S3 event triggers to launch Lambda for log ingestion and Step Functions for task orchestration.
- CI/CD Pipeline with Jenkins & SonarQube – Built a complete CI/CD pipeline for .NET app using Docker, Jenkins, and SonarQube.
- Monitoring Stack – Deployed Prometheus + Grafana on Docker Swarm cluster for metrics and alerting.
- Python Automation – Created scripts for log parsing, email alerts, and cloud cleanup tasks.

Additional Highlights

- Received “Best Performer” award at RND Softek for reducing deployment time by 40%
- Familiar with Elasticsearch for centralized log search
- Practical understanding of cloud-native security and cost optimization
- Comfortable in Agile teams, daily stand-ups, and DevOps ceremonies

Career Goal

To innovate and deliver high-impact cloud-based solutions by leveraging DevOps, automation, and serverless technologies.
